

Yurii Husak

Senior Frontend Developer (Angular)

+380 67 846 5227 · yura.gusak7@gmail.com · linkedin.com/in/yura-husak · github.com/Lertis

Summary

Senior Frontend Developer with 9+ years of experience building web applications, specializing in Angular and TypeScript. Delivered products for the automotive, finance, music and IT infrastructure domains, with a strong focus on clean architecture, reactive state management and automated testing.

Core Experience

- Build Angular single-page applications from requirements to production release
- Manage complex state and asynchronous data flows with RxJS and NgRx
- Create reusable, themeable UI components and document them in Storybook
- Develop data-heavy interfaces with AG Grid, Highcharts and FullCalendar
- Structure large codebases in NX monorepos and contribute to NestJS backend services
- Cover features with unit and end-to-end tests using Jest, Cypress and Playwright
- Maintain code quality with ESLint, Husky and SonarCloud, and track production errors with Sentry
- Deliver multi-language products with ngx-translate and Transifex

Work Experience

Overlapping dates reflect parallel full-time and part-time projects

FP&A Trends — *Senior Full Stack Developer* 2023 – Present

Platform that collects data on the current state of a business and generates recommendations and reports.

- Launched the system from scratch, from idea to full production, with Angular, NestJS and DigitalOcean
- Scaled it across multiple DigitalOcean instances and improved its performance and security

Emil Frey Digital — *Senior Frontend Developer* 2022 – Present

Digital solutions for the automotive industry.

- Continuously improve and extend a very large platform that covers many integrations

Sentium — *Senior Frontend Developer* 2022

Platform for managing the full lifecycle and data of virtual machines.

Simplefox — *Middle+ Frontend Developer* 2021 – 2022

Platform that connects people with similar tastes in music.

Pinnakl — *Middle+ Frontend Developer* 2020 – 2021

Hedge fund platform for creating and managing currency transactions with real-time monitoring.

Juriba — *Middle+ Frontend Developer* 2019 – 2022

Platform for managing large-scale IT transformation projects: desktop, application, server and data center migrations.

Aimtraction — *Junior Frontend Developer* 2017 – 2019

Shyft Auto: online marketplace that streamlines buying and selling vehicles.
EaNG: reactive Angular component library with customizable UX themes (github.com/cgadvisors/eang).

Skills

Core	Angular, TypeScript, JavaScript, RxJS, NgRx, HTML, SCSS
Also worked with	React, NestJS, Ionic
UI libraries	Angular Material, PrimeNG, Kendo UI, ngx-bootstrap, EaNG
Testing	Jest, Playwright, Cypress, Jasmine, Karma
Tooling and quality	NX, Git, ESLint, Prettier, Husky, SonarLint, SonarCloud, Sentry, Storybook, Compodoc, JSDoc
Libraries, services	AG Grid, Highcharts, FullCalendar, Quill, ng-select, date-fns, Lodash, ngx-translate, Transifex, Firebase, DigitalOcean
Languages	Ukrainian (Native), English (B2, Upper-Intermediate)

Education

Ukrainian National Forestry University, Master's Degree in Computer Science 2024 – 2025

Lviv Polytechnic National University, Bachelor's Degree in Software Engineering 2012 – 2017
