Portfolio & Cases (Notion): <https://www.notion.so/33c8f59b83b380bf9d9eeb82f1e7cdcb>

PROFILE

Technical specialist in AI automation, focused on creating autonomous workflows, integrating LLMs into business processes, and developing smart Telegram systems. I have practical experience with low-code tools (n8n), APIs, and Prompt Engineering. I combine an architectural approach to automation with a deep understanding of generative AI tools.

TECHNICAL SKILLS

AUTOMATION & ARCHITECTURE

- n8n (Advanced Workflow Design)
- API Integration & Webhooks
- AI Agents & Multi-agent systems
- Business Process Automation
- AI & LLM OPS
- Prompt Engineering
- LLM Implementation (GPT, Claude)
- Telegram Bots Architecture
- AI Data Analysis

GENERATIVE AI & TOOLS

- AI Image Gen (Midjourney, SD)
- Content Consistency Control
- Python (Basic/Intermediate)
- Docker & PostgreSQL (Basic)

KEY EXPERIENCE & PROJECTS

AI Inventory Automation

Development of an automated property management system. Using AI for data recognition, classification, and synchronization.

AI Call Analysis & Business Systems

Automation of audio data (calls) analysis. Transcription, metrics extraction, and automated report generation.

Telegram Automation Ecosystems

Creation of complex solutions based on the Telegram API for internal process management.

Generative AI Operations

Visual content creation, working on maintaining character stylistics and processing AI artifacts.

TOOLS

AUTOMATION & ANALYTICS:

n8n, ChatGPT, Claude, AI Agents, API Services.

GENERATIVE MEDIA:

Midjourney, Stable Diffusion, Hailuo AI, BananaPro, DALL-E.
